

Akshay Kumar Gupta

Email: hello@akshaygupta.me

Profile: www.akshaygupta.me

Professional Summary

Senior Software Engineer with **8+ years** of experience designing and building enterprise-scale backend systems using **Java, Spring Boot, microservices, PostgreSQL, Kafka, Docker, and AWS**. Proven experience delivering secure Open Banking solutions based on the **Financial Data Exchange (FDX)** standard and building **AI-powered engineering platforms** that improve developer productivity. Expertise in distributed systems, API design, cloud-native applications, and technical leadership across financial services, healthcare, and enterprise consulting.

Experience

Software Engineer III

JPMorgan Chase & Co. April 2025 - Present

- **Leading backend engineering initiatives for the India team**, collaborating with Product Owners, Project Leads, and global engineering teams to deliver enterprise backend and AI-driven engineering solutions.
- Designed and developed Open Banking services implementing the **Financial Data Exchange (FDX)** standard using **Java, Spring Boot, Kafka, PostgreSQL, and AWS**, building FDX Export APIs, consent management services, and event-driven microservices.
- Defined and implemented **an enterprise database rollback strategy** using Liquibase and Spinnaker, standardizing deployment and recovery processes for schema migrations.
- Architected and led the development of **DevKit**, an AI-powered engineering platform leveraging LLMs, AI agents, and MCP to automate SDLC workflows and improve engineering productivity through contextual knowledge retrieval.

Software Engineer II

McKinsey & Company, August 2022 - December 2024

- Designed and delivered enterprise applications across **healthcare, pharmaceutical, fintech, and AI** domains using **Java, Spring Boot, Python, Node.js, React.js, Kafka, Redis, and AWS**.
- Led a **10+ engineer backend team** for a global pharmaceutical client, coordinating technical delivery, conducting design reviews, mentoring engineers, and ensuring timely delivery of scalable microservices.
- Developed **GenAI applications** using **OpenAI, LangChain, Prompt Engineering, Vector Databases, and RAG** for enterprise use cases.
- Built **ELK Stack** solutions and **Kibana plugins** to enhance observability and operational monitoring.
- Designed **microservices** and **REST APIs** with a focus on scalability, reliability, and performance.

Software Development Consultant I

Lumen Technologies, September 2020 - August 2022

- Developed backend services and microservices for **Lumen's Cloud Application Manager (CAM)** using **Java, Python, MongoDB, and AngularJS**.
- Built REST APIs and cloud management features by integrating with **AWS, Azure, and Google Cloud Platform (GCP)** services.

- Worked closely with product and engineering teams to develop new features, fix production issues, and improve application performance.

Software Engineer

Snapwiz Edutec India Pvt. Ltd., March 2018 - September 2020

- Developed backend features for the **Edulastic** learning platform using **Node.js, Java, MongoDB, and MySQL**.
- Built frontend features using **JavaScript (ES6), jQuery, HTML5, and CSS3** to improve the learning experience.
- Owned features from implementation through testing, deployment, and production support while working with product and QA teams.

Technical Skills

Core Expertise:

- Distributed Systems • Event-Driven Architecture • System Design • AI Engineering • Cloud-Native Applications

Programming Languages:

- Java • Python • JavaScript • Node.js

Backend:

- Spring Boot • Hibernate • Kafka • REST APIs • Microservices

Frontend:

- React • Next.js

Cloud & DevOps:

- AWS • Docker • Kubernetes • Terraform • Git • Bitbucket

AI Technologies:

- MCP (Model Context Protocol) • LLMs • Agentic AI • RAG • Prompt Engineering • Vector Databases

Databases:

- PostgreSQL • MongoDB • MySQL • Redis • Pinecone • ChromaDB

Developer Tools:

- IntelliJ IDEA • VS Code • PyCharm • Jira • Confluence

Operating Systems:

- Linux • macOS • Windows

Projects

Open Banking Platform (Financial Data Exchange – FDX)

- Designed and developed secure Open Banking services implementing the Financial Data Exchange (FDX) standard using Java, Spring Boot, Kafka, PostgreSQL, and AWS.
- Built FDX Export APIs, consent management services, and event-driven microservices while defining a standardized Liquibase/Spinnaker rollback strategy for reliable schema deployments.

- Delivered scalable, production-ready APIs aligned with enterprise security and compliance requirements.

DevKit – AI-Powered Project Development Lifecycle (PDLC) Platform

- Built an internal AI-powered platform to accelerate the **Project Development Lifecycle (PDLC)** through intelligent automation and contextual knowledge retrieval.
- Engineered a **contextual knowledge engine** integrating repositories, Jira, Confluence, and Bitbucket (via **MCP**) to improve AI accuracy, reduce token utilization, and enforce enterprise coding standards.
- Automated engineering workflows including requirement analysis, implementation planning, documentation, pull request reviews, and onboarding, reducing development effort by **~60%** across a **20-member engineering team**.

Lumen's Cloud Application Manager (CAM)

- Orchestrated and automated infrastructure, application, and service delivery across various cloud providers, including AWS, GCP, Azure, and Lumen Cloud.
- Improved deployment efficiency by 30% through automation.

Edulastic - Learning Management System

- *Contributed to a robust Learning Management System serving over 10 million users.*
- *Delivered new features, resolved issues, and managed bugs, utilizing NodeJS, MongoDB, Firebase, and JavaScript.*

Education

Educational Qualification	Year	Board/Institution	CGPA*/%
M.Tech (Computer Science)	2017	DIT University, Dehradun	7.89 CGPA (78.9%)
B.Tech (Information Technology)	2015	Dehradun Institute of Technology, Dehradun	69.48%
12 th	2009	Aims Academy, Uttar Pradesh	63.40%
10 th	2007	Aims Academy, Uttar Pradesh	66.83%

Certification and Achievements

- Course in Python (<https://www.udemy.com/certificate/UC-9f537a83-40f4-48d7-8902-1953de99b2de/>)
- Course in GenAI, Java (J2SE and J2EE)
- Received Spot Award from company for delivering the quality software on time.
